Corporate Profile Summary

Incorporated under the Companies Act of Kenya on 27th September 2011, Green Ngoria Supplies Limited has grown from a specialized trading and engineering enterprise into an integrated industrial resource and infrastructure powerhouse.

Our capabilities encompass gold exploration and CIL/CIP processing, gemstone mining, highway and bridge construction, commercial building, water drilling infrastructure, bulk petroleum distribution, and specialized timber importation.

— EXECUTIVE PERSPECTIVE

Message from the Managing Director

Strategic stewardship focused on sustainable industrialization, technical integrity, and value creation.

Davis Mragha Ngoo

MANAGING DIRECTOR

Green Ngoria Supplies Limited

Governance Focus

Ensuring strategic alignment, strict regulatory adherence, transparent client engagements, and sustainable stakeholder return.

“Making your vision become a reality — with unwavering emphasis on engineering quality, operational safety, and dependable delivery across every assignment we undertake.”

Green Ngoria Supplies Limited was established over a decade ago with a singular, clear mandate: to combine practical, hands-on technical proficiency with disciplined project execution across mining, engineering, infrastructure, and regional supply chain logistics.

Over the past thirteen years, our enterprise has matured into a resilient multidisciplinary organization. We have made capital investments in proprietary processing infrastructure—such as our flagship Nyangoma Gold Processing Plant in Bondo, Siaya County—while concurrently executing critical civil, electrical, water, and procurement contracts across Kenya, Tanzania, Rwanda, and Burundi.

Our operational approach is rooted in understanding each client’s specific objective, mobilizing the right technical engineers and modern capital machinery, and executing with meticulous attention to safety, cost-efficiency, and statutory environmental compliance.

As East Africa enters an era of accelerated industrialization and resource-driven development, Green Ngoria remains dedicated to responsible resource stewardship, sustainable community enrichment, and institutional excellence. We welcome you to explore our capabilities and look forward to building lasting, high-impact partnerships with your organization.

Davis Mragha Ngoo

— EXECUTIVE TEAM

Leadership & Strategic Management

A multidisciplinary leadership team combining commercial acumen, technical engineering expertise, and stringent legal governance.

• MANAGING DIRECTOR

Davis Mragha Ngoo

📄 500 ordinary shares (50%)
📍 Head Office, Nairobi, Kenya

Responsible for strategy and for overseeing the group's business, setting governance standards and fostering the effectiveness of the board and of individual directors.

✉️ davisngoo@greenngoria.com
☎️ +254 722 115 133

• DIRECTOR

Kenneth Madete Namboga

📄 250 ordinary shares (25%)
📍 East Africa • Uganda & Kenya

Accountable for company operations and for giving strategic guidance and direction to the board, ensuring the company achieves its mission and objectives across mining, construction and supplies.

✉️ kennethmadete@greenngoria.com
☎️ +256 772 419 871

• DIRECTOR & ATTORNEY

Raymond Nyange Ngoo

📄 250 ordinary shares (25%)
📍 Nairobi, Kenya

Provides legal expertise across the organisation's structures and activities, advising management on the legal and regulatory framework and monitoring corporate governance compliance.

✉️ raymondngoo@greenngoria.com
☎️ +254 710 401 406

• PRODUCTION MANAGER

Chrispine Ryan Ngoo

📄 Executive Management
📍 Field Operations & Mining Sites

Oversees the production and processing operation, including plant throughput, recovery performance, site scheduling and adherence to operating and safety procedures.

✉️ chrispinengoo@greenngoria.com
☎️ +254 794 065 144

Engineering & Operational Human Capital

Our executive leadership is backed by a certified cadre of registered civil and structural engineers, mechanical technicians, metallurgists, geologists, certified safety auditors, and procurement specialists. This allows Green Ngoria to mobilize turnkey teams tailored to the exact technical specifications of each contract.

- Registered Mining Engineers
- Environmental Impact Assessors
- Heavy Equipment Operators
- Mechanical Piping Specialists
- Certified Analytical Chemists
- Civil Works Supervisors

— VISION, MISSION & VALUES

Foundations of Our Corporate Culture

Guiding every operational decision, investment, and partnership across our regional footprint.

CORPORATE VISION

Our Vision

To be a responsible, technologically advanced, and internationally recognized mining, infrastructure, and supply company that drives sustainable economic transformation across Kenya, Tanzania, and the broader East African region.

CORPORATE MISSION

Our Mission

To deliver superior value in mining and engineering through modern operational practices, state-of-the-art comminution technologies, and disciplined capital allocation while prioritizing safety, environmental protection, and community welfare.

Core Operating Principles That Drive Green Ngoria

1. Integrity & Ethics

Uncompromising honesty, contractual fidelity, and transparency across commercial and regulatory transactions.

2. Safety First

Zero-compromise approach to personnel health, mandatory safety PPE, and rigorous hazard identification protocols.

3. Accountability

Full ownership of deliverables, milestones, quality tolerances, and operational schedules on every client site.

4. Environmental Care

Active management of tailings, water recycling, zero toxic river discharge, and post-operational land restoration.

5. Technical Excellence

Deploying modern machinery, precision comminution, and continuous process optimization to enhance resource recovery.

6. Community Impact

Creating local employment, sourcing local supplies, and investing in surrounding community infrastructure.

Tagline: *seasons • create • ideas*

ISO-ALIGNED OPERATIONAL CULTURE

— EHS & QUALITY ASSURANCE

Health, Safety, Environment & Quality

Integrating rigorous safety controls and environmental stewardship across mining pits, processing plants, and construction sites.

ISO 9001:2015

QUALITY MANAGEMENT

ISO 14001:2015

ENVIRONMENTAL CARE

ISO 45001

OCCUPATIONAL HEALTH

Occupational Health & Safety (OHS)

- **Mandatory PPE Regimes:** Full protective gear (hard hats, steel-toe boots, high-vis vests, eye & ear protection) across all site sectors.
- **Daily Tool-Box Briefings:** Reviewing shift hazards, machinery blind spots, and specialized chemical handling protocols.
- **Emergency Response Preparedness:** On-site first-aid stations, eye-wash stations, trained safety marshals, and rapid medical evacuation plans.
- **Continuous Training:** Regular safety refreshers for excavator operators, ball mill crews, and plant personnel.

Quality Assurance (QA/QC) Architecture

Quality is institutionalized across all stages of project delivery—from chemical reagent purity in our elution circuits to aggregate grading in our road projects.

- **Material Sampling & Testing:** Continuous assaying of ore feed, head grades, and tailing residues to verify recovery efficiency.
- **Independent Auditing:** Working with accredited analytical testing laboratories and government mineral inspection bureaus.
- **Traceable Documentation:** Batch records for every gold melt, fuel delivery consignment, and structural concrete pour.

Environmental Stewardship

- **NEMA Licensing & Audits:** Full Environmental Impact Assessment (EIA) approval for gold processing in Nyangoma, Bondo.
- **Tailings Containment:** Engineered tailings ponds with impermeable clay liners to prevent groundwater infiltration.
- **Water Recycling Circuit:** Closed-loop water circulation decanting from tailings ponds back into the comminution circuit.

Engineered Tailings Storage & Environmental Water Containment Systems

— INTEGRATED DIVISIONS

Eight Core Industrial Disciplines

A comprehensive capability portfolio serving resource development, heavy construction, energy, and supply needs across East Africa.

— 01

Gold Mining & Processing

Commercial open-pit extraction, comminution, CIP/CIL leaching, electrowinning, and bullion casting.

PRIMARY DIVISION

— 02

Gemstones & Precious Minerals

Exploration, ethical sourcing, rough grading, and regional trading of Tanzanite, Tsavorite, and Rubies.

MINERAL DIVISION

— 03

Civil & Commercial Building

Turnkey construction, bank fit-outs, institutional structures, renovations, and lift core engineering.

INFRASTRUCTURE

— 04

Road & Highway Works

Bulk earthworks, sub-base formation, asphalt concrete paving, box culverts, bridges, and storm drainage.

INFRASTRUCTURE

— 05

Water Resources Engineering

Hydrogeological surveying, deep borehole drilling, reticulation networks, elevated storage, and pump stations.

UTILITIES

— 06

Mechanical & Electrical

Industrial plant installation, MCC electrical distribution, slurry piping, automation, and backup power.

INDUSTRIAL

— 07

Energy & Petroleum Supply

Bulk distribution of diesel, petrol, jet fuel, bitumen, LPG, industrial lubricants, and depot infrastructure.

COMMODITIES

— 08

Timber & Strategic Sourcing

Hardwood timber importation, heavy crane mats, decking, dunnage, emergency relief, and corporate procurement.

PROCUREMENT

Synergistic Multi-Disciplinary Delivery:

Clients benefit from sourcing civil works, heavy plant installation, energy, and materials under one accountable corporate contract.

TURNKEY INTEGRATION

— FLAGSHIP RESOURCE ASSET

Gold Mining & Mineral Development

Commercial gold extraction and processing operations anchored in Western Kenya and the regional East African mineral corridor.

Aerial Panoramic View of Green Ngoria Mining Pit & Processing Plant • Bondo Sub-County, Siaya County

Regional Exploration & Mining Strategy

Green Ngoria Supplies Limited specializes in commercial gold and gemstone exploration, extraction, and metallurgical processing. With corporate headquarters in Nairobi, our principal mining and mineral processing operations are concentrated in the prolific mineral belts of Bondo and Nyangoma in Siaya County, alongside gemstone and mineral trade activities across Taita Taveta and Tanzania.

Our mineral strategy is built on modernizing extraction workflows: transitioning artisanal ground into capital-intensive, safe, and environmentally compliant mechanized operations with superior recovery yields.

Mining Operations Metrics

- **Location:** Nyangoma, Bondo, Siaya
- **Deposit Type:** Auriferous Quartz Reefs
- **Method:** Mechanized Open-Pit & Benching
- **Processing:** Crushing, Milling & CIL Plant
- **Environmental Status:** NEMA Approved
- **Licensing:** Mineral Dealer’s Processing Licence

High Recovery Yields

Deploying fine-particle ball mill comminution and multi-stage CIL cyanidation to maximize bullion liberation.

Cost & Margin Discipline

Integrating our own heavy excavation fleet and branded transport tippers to maintain tight cost efficiency.

Active Excavation Cut & Systematic Benching Operations

— EARTHMOVING & EXTRACTION

Open-Pit Mining & Geological Exploration

Precision excavation, geological reef tracking, and systematic overburden stripping using heavy crawler equipment.

Shantui SE335LCW Heavy Crawler Excavator Trenching a Gold Vein in Deep Pit

Structural Quartz Vein Extraction & Overburden Benching

Geological Grade Control & Extraction Workflow

Our open-pit mining operations exploit primary auriferous quartz veins hosted within high-grade shear zones. The deposit is systematically excavated using heavy hydraulic crawler excavators capable of deep trenching and rock breakout.

Geologists and grade-control technicians monitor every benching cut, taking systematic channel samples to separate high-grade ore from waste rock before dispatching the material to primary comminution circuits.

High-Grade Auriferous Quartz Vein Ore Samples

Pit Stability & Drainage

Engineered bench walls with strict slope angles and perimeter stormwater ditches to guarantee slope stability during wet seasons.

Selective Mining

Minimizing ore dilution by following quartz reef contacts under direct geological supervision.

Mineralization Characteristics

Free-milling native gold associated with sulphide-bearing quartz stringers, responsive to gravity concentration and cyanidation.

— HEAVY CAPITAL FLEET

Mechanized Fleet & Commercial Haulage

Modern capital machinery ensuring continuous ore feed from open-pit excavations to processing stockpiles.

Green Ngoria Heavy Commercial Tipper Hauler Loaded with Ore

LiuGong 30-Ton Excavator Loading a Heavy Hauler in Pit

30+ TONS

EXCAVATOR CLASS

25 TONS

HAULER PAYLOAD

24/7

FLEET AVAILABILITY

Heavy Earthmoving Fleet Specifications

- **Shantui SE335LCW Excavators:** Heavy-duty tracked excavators with reinforced boom and heavy rock buckets for quarrying hard quartz formations.
- **LiuGong Heavy Excavators:** High breakout-force crawler excavators for benching and high-capacity truck loading.
- **Heavy-Duty Tipper Trucks:** Branded multi-axle tippers purpose-built for mining haul roads and rough terrain transport.
- **Site Utility Fleet:** Water tankers for dust suppression, service trucks, and diesel bowzers.

Maintenance & Preventive Servicing

Unplanned downtime is minimized through a disciplined on-site preventive maintenance regime. Dedicated mechanical workshops maintain comprehensive spare parts inventories, ensuring machinery operates at peak performance.

Strict fuel management protocols, digital hour meters, and routine lubricant sampling ensure optimal engine longevity across our mobile assets.

— NYANGOMA GOLD PLANT

The Nyangoma Processing Complex

A fully integrated mineral beneficiation plant combining comminution, gravity separation, and Carbon-in-Leach extraction.

High-Angle Drone Survey of the Complete Nyangoma Gold Processing Infrastructure

Modern Metallurgical Engineering

The Nyangoma Processing Plant represents a significant capital investment by Green Ngoria Supplies Limited, engineered to process both high-grade run-of-mine (ROM) ore and historical tailings dumps with superior gold recovery efficiencies.

The plant layout is strategically configured on a natural gradient to take advantage of gravity slurry flows between comminution, classification, agitation leaching, and tailings thickening stages.

Processing Flow Stages

1. Primary Jaw Crushing (0-25mm)
2. Ball Mill Wet Grinding (P80 75µm)
3. Hydrocyclone Classification
4. Gravity Sluicing & Concentration
5. Carbon-in-Leach (CIL) Cyanidation
6. Carbon Elution & Electrowinning
7. Induction Smelting into Bullion

Continuous Throughput

Engineered for high daily tonnage throughput with robust mechanical components capable of handling hard quartz feed.

Water Management

Closed-circuit process water pumping system recycling up to 90% of water from thickeners back to the ball mill.

High-Level Walkways & Slurry Agitators

— CRUSHING & GRINDING

Comminution: Crushing & Ball Mill Grinding

Particle size reduction to liberate microscopic gold particles from a hard quartz matrix prior to cyanidation.

Twin Ball Mill Circuit & Sample Collection Point

Primary Crushing Plant, Jaw Crusher & Conveyor Stockpile System

Comminution Circuit Engineering

Effective gold recovery depends directly on achieving the optimal grind size to expose gold surfaces to the cyanide leach solution. Run-of-mine ore is first reduced by primary jaw crushers, screened, and fed into heavy-duty rotating ball mills charged with forged steel grinding media.

Water and chemical lime are added directly into the mill feed to maintain an alkaline slurry pH (10.5–11.0), preventing hazardous gas generation and conditioning the ore for subsequent leaching.

Grind Target (P80 75 Micron)

Ensuring 80% of slurry particles pass through 200 mesh screens, liberating ultra-fine disseminated gold.

Gravity Pre-Concentration

Ball mill discharge passes over sluices and shaking tables to extract coarse free gold before the leaching circuit.

Ball Mill Discharge Sluice & Gravity Catch Box

Liner & Media Management

High-chromium alloy shell liners and graded forged steel balls ensure maximum impact and attrition grinding while resisting abrasive wear.

— CIL & CIP TECHNOLOGY

Carbon-in-Leach (CIL) Processing

High-efficiency chemical dissolution of gold and simultaneous adsorption onto premium activated coconut carbon.

Large-Scale Vertical Leaching & Carbon Adsorption Tanks with Safety Walkways

Continuous Multi-Stage CIL Agitation Battery with Top-Entry Drive Motors

The CIL Extraction Advantage

Green Ngoria utilizes the Carbon-in-Leach (CIL) process, where gold dissolution and carbon adsorption occur simultaneously within the same agitated tank cascade. This process provides superior recovery rates, particularly for ores containing carbonaceous matter or preg-robbing constituents.

Top-entry mechanical dual-impeller agitators keep the heavy slurry in continuous suspension while low-pressure spargers introduce dissolved oxygen to accelerate leaching kinetics.

Counter-Current Carbon Flow

Slurry flows downstream through the tank cascade while granular activated carbon is pumped upstream, maximizing gold loading.

Interstage Wedge-Wire Screens

Precision stainless steel screens retain carbon particles in each tank while permitting slurry to advance freely.

Carbon Acid-Wash & High-Pressure Elution Column

Activated Carbon Specs

Premium coconut-shell activated carbon (6×12 mesh) with high hardness rating and superior gold adsorption capacity (up to 4,000 g/t Au).

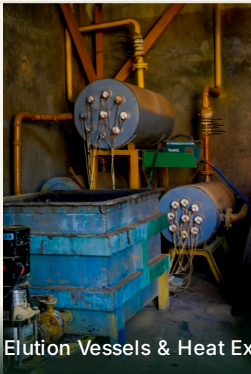

— ELUTION & ELECTROWINNING

Desorption, Electrowinning & Smelting

Stripping pregnant gold from carbon, electro-depositing onto stainless cathodes, and smelting into high-purity gold doré.

Centrifugal Gravity Concentrator Recovering Coarse Free Gold

High-Temperature Elution Vessels & Heat Exchange Circuit

The Zadra / AARL Elution Process

Loaded carbon containing adsorbed gold is harvested from the lead CIL tank, acid-washed with dilute hydrochloric acid to remove carbonate scaling, and transferred into a pressurized elution column. A heated caustic cyanide solution (110°C–130°C) strips the gold back into a concentrated pregnant eluate solution.

The pregnant solution enters electrowinning cells where direct electric current drives gold ions to deposit onto stainless steel wool cathodes as high-grade gold sludge.

Gold Room Security Protocols

- 24/7 Monitored High-Definition CCTV
- Dual-Custody Keycard & Biometric Access
- Armored Bullion Safes & Security Vaults
- Continuous Armed Police Escort Coordination
- Tamper-Evident Security Seals on All Melts

Induction Furnace Smelting

Cathode sludge is treated with flux (borax, silica, sodium nitrate) and smelted at 1,150°C into solid gold doré bullion bars.

Thermal Carbon Regeneration

Stripped carbon is reactivated in a diesel-fired rotary kiln to burn off organic foulants before returning to CIL tanks.

Bullion Purity Target

Consistently pouring gold doré bars ranging between 88% and 94% purity prior to final commercial refining.

— PROVEN PHYSICAL OUTPUT

Gold Bullion Production & Doré Showcase

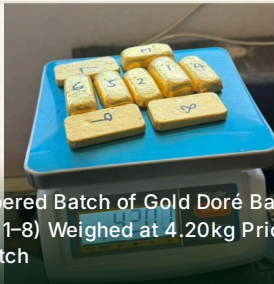

Verified physical gold doré bars cast on site and assayed on precision analytical laboratory balances.

Physical Gold Doré Bar (784.10g)
Assayed on Swiss Mettler Toledo
Precision Analytical Balance

Refined Gold Bullion Bar Ready for
Central Bank / Refinery Dispatch

Numbered Batch of Gold Doré Bars
(Nos. 1–8) Weighed at 4.20kg Prior to
Dispatch

Commercial Bullion Management & Chain of Custody

Green Ngoria Supplies Limited maintains a rigorous, auditable chain of custody from the moment gold sludge is harvested from electrowinning cells to the final weighing and stamping of gold doré bars.

Every bar poured carries a unique stamped serial identifier, verified weight, and specific gravity assay determination. Our physical output validates the operational success and recovery efficiency of the Nyangoma processing complex.

Coarse Gravity-Recovered Gold Nuggets & Buttons

Mettler Toledo Precision

Calibrated Swiss digital balances record bar weights to two decimal places under dual oversight.

Refinery Compliance

Strict conformity with Kenya Mining Act 2016 and international OECD Due Diligence Guidelines for Responsible Supply Chains.

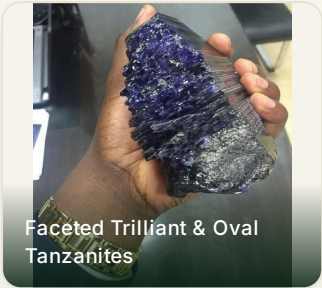

Statutory Mineral Licensing

Operating under an official Mineral Dealer's Processing Licence issued by the Ministry of Petroleum and Mining, Kenya.

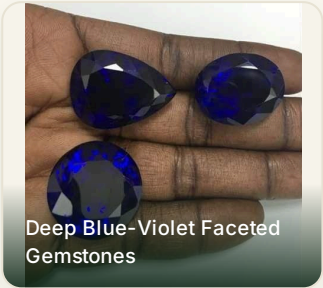

GEMSTONE DIVISION

East African Gemstones Portfolio

Ethical sourcing, lapidary cutting, and regional trading of world-renowned Tanzanite, Tsavorite, and Corundum varieties.

Faceted Trilliant & Oval Tanzanites

Deep Blue-Violet Faceted Gemstones

Vivid Purple Trilliant-Cut Gems

Regional Gemstone Sourcing Site

Rare Mineral Wealth of the Mozambique Belt

The East African geological corridor—spanning the metamorphic Mozambique Belt across Kenya and Tanzania—hosts some of the world’s most coveted colored gemstones. Green Ngoria Supplies Limited maintains active sourcing and trading channels across primary mining hubs.

From the rare trichroic zoisite (Tanzanite) mined exclusively in the Merelani Hills of Tanzania to the vanadium-rich Tsavorite green grossular garnets of Taita Taveta, our gemological division provides certified parcels for international jewelry and collector markets.

Featured Gem Varieties

- **Tanzanite:** 1,000× rarer than diamond
- **Tsavorite Garnet:** Vivid emerald hue
- **Ruby & Sapphire:** Corundum crystals
- **Tourmaline:** Chrome & bi-color
- **Rhodolite Garnet:** Purplish-red gems

Gemological Grading

Clarity, carat weight, color saturation, and cut geometry verified to GIA international gemological standards.

Regional Trade Corridor

Cross-border logistics and export compliance between Nairobi, Arusha, and global mineral centers.

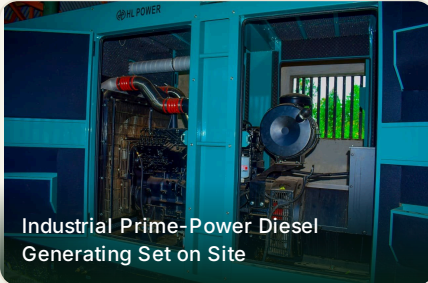

Traceability & Conflict-Free

All gemstone shipments are 100% compliant with government mineral royalties, export permits, and Kimberley-aligned traceability standards.

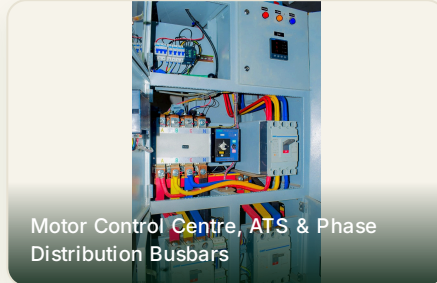

— POWER & ELECTRICAL SYSTEMS

Site Power Engineering & MCC Systems

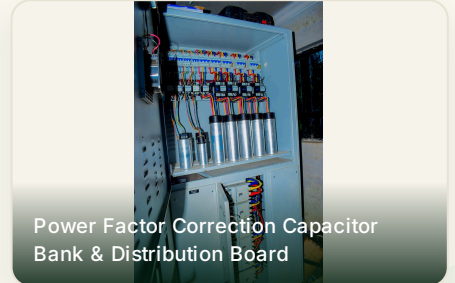

Industrial prime-power generation, Motor Control Centers, and heavy pumping infrastructure sustaining 24/7 mineral operations.

Industrial Prime-Power Diesel Generating Set on Site

Motor Control Centre, ATS & Phase Distribution Busbars

Power Factor Correction Capacitor Bank & Distribution Board

Uninterrupted Industrial Power Infrastructure

Continuous ball mill grinding and CIL slurry agitation demand absolute power reliability to prevent tank settling and motor burnout. Green Ngoria has engineered a dual-source electrical power infrastructure combining utility grid connections with heavy industrial diesel generator sets.

Automated transfer switches (ATS) guarantee seamless switchover within seconds of grid interruption, ensuring zero disruption to leaching kinetics or slurry movement.

Electrical Engineering Scope

- 415V 3-Phase Main Switchboards
- Power Factor Correction Banks
- Surge & Lightning Protection Grid
- High-Mast Perimeter Security Lighting
- Industrial Earthing & Grounding Mesh

Integrated Motor Protection

Variable Frequency Drives (VFD) and soft-starters reduce mechanical stress on large ball mill electric motors.

Heavy Slurry Pumping

High-head centrifugal slurry pumps with rubberized liners transport abrasive quartz pulp between processing stages.

Bulk Fuel Storage

Bunded above-ground diesel storage tanks with calibrated dispensing meters ensure continuous fuel security for generators and heavy mobile equipment.

— TAILINGS & WATER STEWARDSHIP

Tailings Management & NEMA Compliance

Engineered containment, chemical neutralization, and water recycling meeting rigorous Kenyan environmental benchmarks.

Engineered Tailings Storage Facility, Settling Ponds & Environmental Buffer Zone • Bondo

Closed-Circuit Environmental Protection

Environmental protection is fundamental to our operational licence. The Nyangoma processing facility operates under formal NEMA Environmental Impact Assessment Licence (No: NEMA/ENVIS/CPR/LIC-5448). Tailings slurry discharging from the CIL circuit undergoes chemical neutralization before transfer into engineered containment storage.

Impermeable compacted clay liners protect surrounding subsoil and groundwater tables. Settled supernatant water is decanted through multi-stage clarification ponds and recycled directly back into the comminution circuit.

NEMA Regulatory Pillars

- ✓ Formal EIA Expert Licensing
- ✓ Annual Environmental Audits
- ✓ Atmospheric Dust Suppression
- ✓ Community Grievance Mechanisms
- ✓ Progressive Pit Rehabilitation

Zero River Discharge

100% of process water is contained in closed-loop circuits; no untreated industrial effluents enter natural watercourses.

Groundwater Monitoring

Perimeter monitoring boreholes are tested quarterly by certified laboratories to confirm total environmental isolation.

Post-Mining Restoration

Stockpiled topsoil is preserved for progressive backfilling and revegetation, returning mined land to productive agricultural use.

BUILDING & STRUCTURAL WORKS

Civil, Building & Structural Engineering

Commercial construction, institutional headquarters, structural steelwork, and high-specification architectural finishes.

On-Site Concrete Batching & Structural Works

Completed Residential Build — Foundation to Finishes

Multi-Storey Structural Framing & Roof Erection

Turnkey Building Execution Across East Africa

Green Ngoria Supplies Limited possesses established capacity in general building and civil engineering works. Our engineering project teams have successfully delivered high-specification commercial refurbishments, structural retrofits, and interior works for financial institutions and corporate clients across Kenya, Rwanda, and Burundi.

From greenfield structural construction to delicate heritage restorations and secure banking halls, we apply disciplined supervision, quality concrete batching, and precision project scheduling.

Selected Institutional Clients

- **Bank of Kigali:** Branch renovations
- **Banque Populaire du Rwanda:** Kigali Market
- **Fina Bank:** Gitarama Branch Modernization
- **Soras Headquarters:** Executive Offices
- **Kabgayi Diocese:** Architectural Aluminium
- **Hotel Amahoro (Burundi):** Schindler Lift Core

Scope of Services

New commercial buildings, high-rise structural cores, architectural drywall partitioning, acoustical ceilings, and epoxy flooring.

Vertical Transportation

Design and construction of reinforced concrete elevator shafts and turnkey installation of passenger elevators.

Materials Standards

Structural steel tested to BS 4449 / KEBS standards with slump and cube crush testing for all reinforced concrete pours.

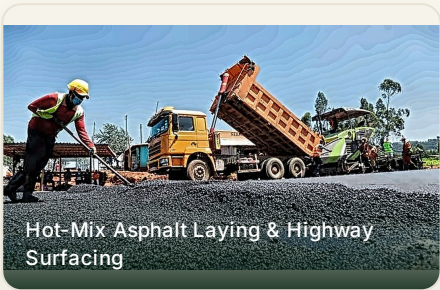

ROADS & HIGHWAYS

Road, Highway & Bridge Construction

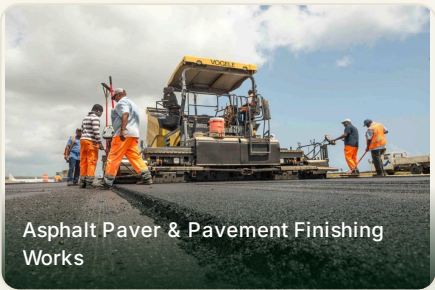

Heavy earthworks, soil stabilization, asphaltic concrete paving, and drainage engineering supporting regional transit networks.

Road Earthworks, Grading & Sub-Base Preparation

Hot-Mix Asphalt Laying & Highway Surfacing

Asphalt Paver & Pavement Finishing Works

Comprehensive Civil Highway Engineering

Green Ngoria’s infrastructure division delivers heavy transportation works for national highway authorities, county governments, and private developers. Our civil engineering teams handle everything from pioneer road opening in remote rural terrains to heavy-duty urban asphalt overlays.

We operate modern heavy equipment: motor graders, pneumatic and vibratory rollers, asphalt pavers, bitutainers, and concrete mixers to ensure strict compliance with Ministry of Transport specifications.

Core Road Capabilities

- Bulk Earthworks & Cut-and-Fill
- In-Situ Chemical Soil Stabilization
- Asphalt Concrete (AC) & Surface Dressing
- Reinforced Concrete Bridges & Culverts
- Stormwater Drainage & Erosion Control
- Road Furniture, Signage & Thermoplastic Markings

Pavement Layers

Sub-grade preparation, neat gravel sub-base, cement-stabilized base course, and hot-mix asphalt (AC Type I & II).

Hydraulic Structures

Reinforced concrete box culverts, Armco pipe culverts, gabion baskets, scour checks, and lined stone-pitch drains.

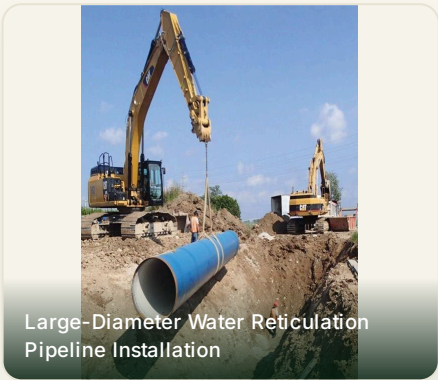

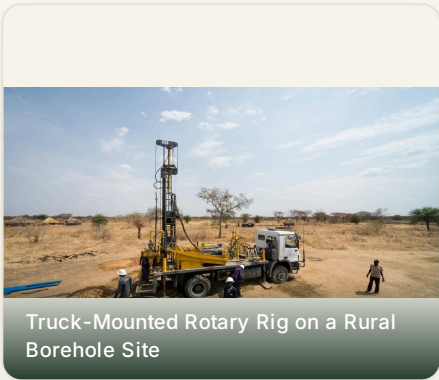

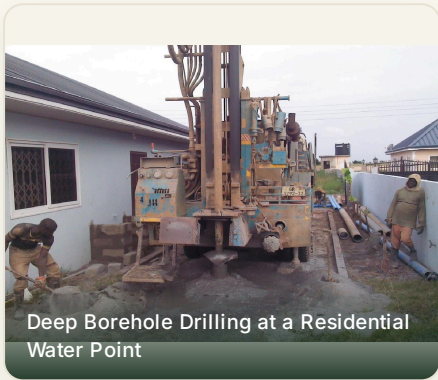

Devolved Infrastructure Support

Committed to accelerating county road connectivity and opening productive agricultural and mineral hinterlands.

— RESOURCES & UTILITIES

Water Projects & Borehole Infrastructure

Hydrogeological exploration, deep rotary drilling, reticulation networks, and commercial water supply solutions.

Integrated Groundwater & Municipal Engineering

Clean, reliable water is essential for communities, agriculture, and industrial operations. Green Ngoria Supplies Limited provides end-to-end water engineering services from hydrogeological surveying and aquifer profiling to deep borehole drilling and long-distance pipeline reticulation.

We install submersible solar-powered and AC pumping systems, construct elevated steel and masonry distribution reservoirs, and deploy complete water treatment plants to deliver potable water that complies with World Health Organization (WHO) and KEBS standards.

Water Solutions Portfolio

- Groundwater Geophysical Surveys
- Deep Commercial Borehole Drilling
- HDPE, uPVC & Steel Pipe Reticulation
- Elevated Pressed-Steel Storage Tanks
- Municipal Sewerage & Wastewater Plants
- Solar-Powered Pumping Installations

Rotary & DTH Drilling

High-capacity drilling rigs capable of penetrating hard volcanic basalt, granites, and sedimentary formations to 350m+ depth.

Testing & Equipping

24-hour step-drawdown test pumping, chemical water quality profiling, and high-efficiency Grundfos submersible pumps.

WRA Regulatory Compliance

All water abstraction works are fully permitted through the Water Resources Authority (WRA) with strict environmental impact assessments.

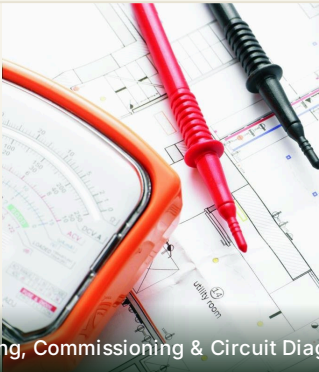

MECHANICAL & ELECTRICAL

Mechanical, Electrical & Automation Services

Industrial plant installation, precision structural fabrication, heavy slurry piping, and automated process controls.

High-Voltage Substation, Switchgear & Busbar Systems

Electrical Testing, Commissioning & Circuit Diagnostics

Turnkey Industrial Engineering Solutions

Backed by more than ten years of specialized industrial engineering experience, Green Ngoria provides integrated mechanical and electrical services for mineral processing plants, manufacturing facilities, commercial developments, and infrastructure utilities.

Our engineers execute complex plant installations from initial structural alignment and laser shaft leveling to high-pressure certified welding, pneumatic controls, and electrical commissioning.

Engineering Services Matrix

- Factory Machinery Erection & Rigging
- Pipework: Steel, HDPE & High-Pressure PVC
- Preventative Maintenance Contracts
- Energy-Efficiency System Audits
- Testing, Balancing & Plant Commissioning

Mechanical Capabilities

Heavy conveyor erecting, crushers, ball mill gear alignment, slurry pipeline networks, high-pressure boilers, and pump skids.

Electrical & Automation

PLC control, SCADA monitoring, Motor Control Centers (MCC), transformer installation, and energy audits.

Standards Adherence

All electrical works certified by Energy and Petroleum Regulatory Authority (EPRA) licensed engineers and ASME-qualified welders.

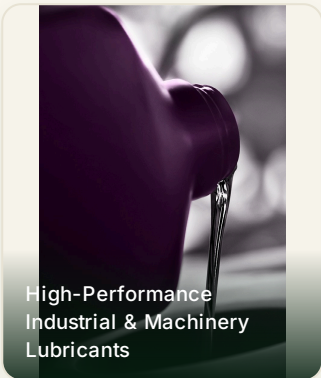

— PETROLEUM & LUBRICANTS

Petroleum Products, Lubricants & Energy

Bulk refined fuels, industrial lubricants, specialized depot storage, and retail fuel-station infrastructure delivery.

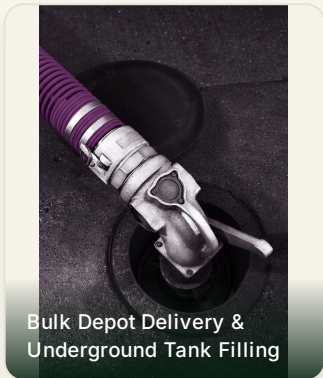

Retail Fuel Dispensing & Service-Station Pumps

High-Performance Industrial & Machinery Lubricants

Fuel Quality Assurance & Laboratory Testing

Bulk Depot Delivery & Underground Tank Filling

Bulk Energy Sourcing & Supply Logistics

Green Ngoria's petroleum division supplies high-specification fuels, industrial lubricants, and specialized chemicals to corporate fleets, construction contractors, mining sites, and agricultural enterprises throughout East Africa.

We manage robust supply chains from coastal import terminals to regional consumption points, supported by dedicated road tankers equipped with digital flow meters and GPS tracking to guarantee fuel integrity and quantity.

Fuel Station & Depot Development

- Turnkey Service Station Construction
- Underground Double-Walled Fuel Tanks
- Electronic Dispensing Pump Integration
- Oil-Water Interceptor Drainage
- EPRA & NEMA Statutory Approvals

Refined Fuel Portfolio

Low-Sulphur Diesel (AGO 50ppm), Premium Motor Spirit (PMS), Jet A-1 Fuel, Kerosene, Heavy Fuel Oil (HFO), and Bitumen.

Heavy Industrial Lubricants

High-performance engine oils (15W-40), gear lubricants, heavy hydraulic oils (ISO 46/68), and extreme-pressure chassis greases.

On-Site Fuel Bunkering

Delivering dedicated skid-mounted fuel storage and dispensing units to remote mining and construction camps.

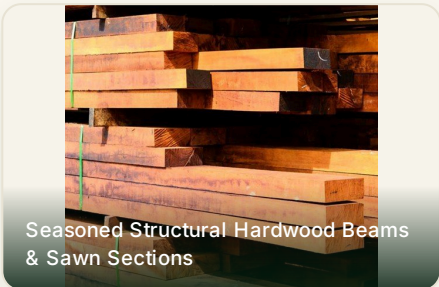

— FORESTRY & TIMBER PRODUCTS

Timber Importation & Forest Products

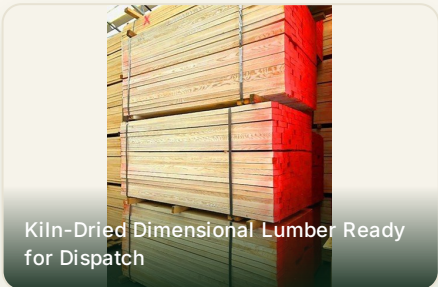

Sourcing certified sustainable hardwoods, softwoods, heavy crane mats, and bespoke timber for heavy civil and marine engineering.

High-Grade Deciduous Sawn Hardwood Timber Stacks

Seasoned Structural Hardwood Beams & Sawn Sections

Kiln-Dried Dimensional Lumber Ready for Dispatch

High-Specification Structural Timber Supply

As a licensed timber importer, Green Ngoria Supplies Limited sources premium hardwood and softwood species from certified sustainable forestry concessions across Central Africa and international markets, delivering quality timber at competitive prices.

Our inventory satisfies demanding structural requirements across heavy civil engineering, maritime jetties, oilfield pipe yards, and commercial construction projects where timber strength, durability, and treatment are paramount.

Timber Products Catalog

- Deciduous Sawn Hardwoods (Mahogany, Teak)
- Softwood Construction Lumber (Pine, Cypress)
- Heavy Crane Mats & Rig Outrigger Pads
- Hardwood Marine Decking & Bollards
- Marine-Grade Structural Plywood
- Custom-Milled Bespoke Dimensional Timber

Heavy Industrial Applications

Heavy excavator crane mats, swamp mats, pipe skids, marine fenders, dunnage, and trench shoring timbers.

Treatment & Seasoning

Kiln-dried, CCA pressure-treated, and creosote-treated timber resistant to fungal decay, termites, and marine borers.

FSC Chain-of-Custody

Committed to ethical forestry practices; all imported timber is backed by legal origin certificates and phytosanitary inspection documents.

— STRATEGIC PROCUREMENT

General Supplies & Institutional Procurement

Reliable sourcing, warehousing, and rapid last-mile distribution of institutional goods, relief merchandise, and consumables.

Warehoused Humanitarian Relief Merchandise & Institutional Goods Ready for Dispatch

Green Ngoria Regional Logistics & Last-Mile Delivery Network

Dependable Corporate & Humanitarian Supply Chains

The general supplies division of Green Ngoria Supplies Limited provides end-to-end procurement solutions for commercial corporations, financial institutions, government ministries, and international non-governmental organizations (NGOs).

We bridge the gap between large-scale manufacturers and decentralized field operations, managing quality verification, secure bulk warehousing, customs clearance, and coordinated transport across Kenya and regional borders.

Key Client Segments

- **Government Entities:** Ministries & Parastatals
- **Humanitarian NGOs:** Regional Relief Agencies
- **Financial Sector:** Commercial Banks
- **Industrial Mining Camps:** Remote Consumables
- **Construction Contractors:** Site Consumables

Institutional Consumables

Office stationery, computer hardware, printing consumables, industrial cleaning supplies, and corporate uniforms.

Emergency Relief Supplies

Non-food relief items (NFI), shelter materials, tarpaulins, water purification chemicals, and emergency blankets.

Commercial Proposition

Reliable sourcing. Practical fulfillment. One accountable supplier managing quality, competitive pricing, and strict on-time delivery.

— VALUE PROPOSITION

Why Partner with Green Ngoria?

A proven operational model built on multidisciplinary agility, capital investment, and regional execution.

1. Multidisciplinary Integration

Clients avoid vendor sprawl by sourcing mining extraction, civil works, electrical engineering, fuel, timber, and supplies from a single coordinated partner.

2. Capital Fleet & Asset Ownership

We own our processing plants, heavy crawler excavators, diesel generators, and branded commercial transport haulers, giving us direct control over timelines and cost.

3. 13+ Years Operating Track Record

Incorporated in 2011, our business stability and institutional knowledge ensure dependable execution on complex, multi-year projects.

4. Regional Cross-Border Reach

Demonstrated project experience across Kenya, Tanzania, Rwanda, and Burundi with deep understanding of local regulatory and logistics frameworks.

5. Rigid EHS & NEMA Compliance

We operate in full alignment with ISO 9001, ISO 14001, and ISO 45001 safety frameworks, with active NEMA environmental approvals on all sites.

6. Commercial Integrity & Agility

Transparent pricing, verified statutory tax standing, agile decision-making, and an unbending commitment to client satisfaction.

— EXECUTIVE PLEDGE

“Making Your Vision Become a Reality.”

At Green Ngoria Supplies Limited, we view every contract as a long-term commercial partnership. Whether developing complex gold extraction infrastructure, executing highway earthworks, or supplying critical commodities to regional operations, our multidisciplinary team stands ready to deliver with engineering precision and commercial excellence.
